

AI Usage Policy for Educational Institutions

Governing the Use of aiSTART by Slangit in K-12 Education

Version: 2.0 | Effective Date: 03-03-2026
Stakeholders: Students, Teachers, Administrators, IT Staff, School Leadership, Ministries
Platform: aiSTART – AI Learning Infrastructure

1. INTRODUCTION

Artificial Intelligence is becoming an essential component of modern education. When implemented responsibly, AI can enhance learning experiences, support teachers, and empower students with new capabilities for inquiry, creativity, and problem solving. aiSTART, developed by Slangit Technologies, is an AI-powered learning infrastructure designed specifically for educational institutions. The platform integrates AI-assisted learning tools, analytics, and digital learning environments to support students, teachers, administrators and government officials. Because AI technologies have the potential to influence learning behavior, information access, and decision-making processes, their deployment within educational environments must be governed by clear policies that protect students and ensure responsible use.

This policy establishes the governing framework for the safe, ethical, and responsible use of aiSTART within K-12 educational institutions.

2. PURPOSE OF THIS POLICY

The purpose of this policy is to:

- Ensure responsible use of AI technologies on aiSTART
- Protect the safety and wellbeing of students
- Maintain academic integrity within AI-assisted learning environments
- Safeguard student data and privacy
- Ensure that AI technologies enhance and not replace the role of teachers
- Align AI usage with the cultural, ethical, and regulatory standards of countries within the Arab world

3. SCOPE OF APPLICATION

This policy applies to all users who interact with aiSTART within an educational institution, including: students, teachers, school administrators and leadership, psychology and behavioural analysts, inclusion and wellbeing heads, IT personnel and institutional partners.

The policy governs the use of all AI-enabled capabilities available within aiSTART, including but not limited to:

- AI learning assistants in the form of tools (previously known as Sorgi)
- AI-powered lesson support tools including the AI powered summary, AI Chatting as a private tutor, and AI note summarizer
- AI-generated content creation in different forms (text, images, videos, and audios)
- AI assessment generation
- AI learning analytics
- AI-powered audio or speech learning tools in the form of a teacher and/or podcasts
- AI-powered personas driving the expert corner once this is activated per school

4. GUIDING PRINCIPLES FOR AI USE ON aiSTART

The design and use of aiSTART within educational institutions must adhere to the following principles.

- **Human-Centred Education:** aiSTART is designed to support teachers and learners. AI within the

platform must never replace the role of educators or substitute human academic judgment. The purpose of the platform is to ensure access to technology and a new experience for students in receiving the content, the teachers in delivering the content, the administration in assessing the performance, all by leveraging the AI tools and capabilities on the platform.

- **Educational Purpose:** All AI tools within aiSTART must be used exclusively for educational purposes related to learning, teaching, or educational administration.
- **Student Protection:** aiSTART must operate with safeguards that protect students from harmful, inappropriate, or misleading content. The platform has been designed with proper guardrails preventing any usage that violates any inappropriate content.
- **Cultural and Ethical Alignment:** Content generated through aiSTART respects the cultural values, traditions, and social norms of the societies in which the platform is deployed. This includes the curriculum as well as the generated output through the AI tools.
- **Transparency:** Students and teachers must understand when AI is assisting in generating content, recommendations, or responses. Users must repeatedly understand that AI is a tool meant to help and not to do the whole work.
- **Accountability:** Educational institutions remain responsible for supervising and governing how AI is used on aiSTART among its users. Slangit remains available to support and guide when things are not clear for such users by contacting us through the relevant contact details.

5. PERMITTED USE OF aiSTART

- a. Students, with access to aiSTART, will use the platform to support their learning through activities such as:
 - i. **Asking questions** related to school subjects. These include in addition to the AI curriculum built into aiSTART, the other subjects that are delivered by the school.
 - ii. **Exploring educational topics** and concepts through AI tools for content generation that trigger their imagination, creativity, problem-solving and enhance their learning experience.
 - iii. **Receiving explanations** of academic material but not to the extent that does the whole work including solving homework or exams.
 - iv. **Brainstorming ideas** for projects and research through the usage of AI tools and following the principles provided in the curriculum.
- b. Teachers, with access to aiSTART, will use the platform to support their professional work by:
 - i. **Preparing lesson materials** in different forms and structure.
 - ii. **Generating teaching resources** such as cards, audio, videos and images
 - iii. **Creating assessments** and learning exercises while ensuring that this becomes a learning experience to enhance students experience.
 - iv. **Supporting differentiated learning approaches** including the option for students to ask their personal AI Private Tutor for questions, engaging in discussions with AI, creating debates and ensuring learning outcomes are achieved by students.
 - v. **Assisting with research and instructional planning** through the proper AI guidance and responsible usage.
 - vi. **Drive subject hosting** of the different presentations prepared by them to be hosted on the platform to maximize on the usage and the analytics.
- c. School administrators including principles, psychologists, inclusion and wellbeing, and other similar functions will use the platform to:
 - i. **Monitoring learning engagement** and performance across bother academic and psychological evolution.
 - ii. **Reviewing aggregated analytics** through the dashboards and the expert corner leveraging the AI persons prebuilt.
 - iii. **Supporting academic planning** and improvement strategies
 - iv. **Driving scale and growth** through increasing the usage to cover other learning

material beyond the pre-build AI curriculum to maximize on the data capture and analytics as requested by teacher in b.vi above.

6. PROHIBITED USE OF aiSTART

The following uses of AI tools and features on aiSTART are strictly prohibited:

a. Inappropriate Content Generation:

- i. Sexual or explicit material in regards to new content generation
- ii. Pornographic or nude content including any edits of images or videos
- iii. Violence or abuse in any form, except for storytelling leading to a lesson learned and development purposes.
- iv. Hate speech or discrimination in any form, except for storytelling leading to a lesson learned and development purposes.
- v. Harassment or cyberbullying in any form, except for storytelling leading to a lesson learned and development purposes.
- vi. Illegal activities in any form, except for storytelling leading to a lesson learned and development purposes.
- vii. Impersonate individuals or even ask for any content in images or videos that include celebrities.
- viii. Generate false information about people.
- ix. Fabricate academic content that is not correct or true.
- x. Any political content of any kind.

b. Academic Misconduct

- i. Submit AI-generated assignments as their own work without learning.
- ii. Bypass academic assessments through an upload of the assessments and request for solving.
- iii. Cheat on tests or examinations through an upload of the exams and request for solving or ask AI to provide the answer or even the detailed explanation.

While the prohibited categories are clearly listed, aiSTART is designed to block any attempts by users to violate such guidelines except for (b) above. For (b), this will be left for teachers' judgement, personal evaluations and discussions with students. On such occasions, identified persons within schools will be notified with such violation, knowing that this goes into student records.

7. ACADEMIC INTEGRITY

- Students must ensure that academic work submitted on the community reflects their own understanding and efforts.
- Teachers may at their own disposal implement additional verification mechanisms such as oral explanations or in-class demonstrations of understanding

AI tools are intended to support learning and discussions, creativity and imagination, ideas triggering and problem solving. They are not intended to replace intellectual engagement.

8. STUDENT DATA PRIVACY

Slangit is committed to protecting the privacy and security of users within aiSTART platform in compliance with local laws and regulations. All data processed within aiSTART will not be used to train any large language models and will remain confidential within the educational ecosystem.

9. AI SAFETY CONTROLS

aiSTART incorporates safety mechanisms designed to maintain a secure educational environment. These safety controls include but not limited to content moderation, prompt safety controls, automated detection of harmful requests, and system monitoring for misuse. These safeguards aim to ensure that AI interactions remain appropriate for educational settings. However, these will be used for detecting and measuring psychological and emotional behaviours.

10. ROLE OF EDUCATORS

Teachers play a central role in guiding responsible AI usage on aiSTART platform. Educators are responsible for:

- Supervising student interactions with aiSTART and addressing any challenges students have including building scaffold prompts.
- Validating AI-generated content used in teaching to ensure these address the expected outcome and that students are aware of what is being built.
- Helping students understand the limitations of AI systems and how to learn and engage with AI tools.
- Promoting responsible and ethical technology use which is part of the built-in curriculum focusing on the digital citizenship and the digital footprint.

AI within aiSTART is always recommended to operate under the supervision of educators. However, aiSTART is designed to allow students to self learn with the support of the AI private tutors.

11. MONITORING AND COMPLIANCE

Schools administrators shall monitor the usage to ensure compliance with this policy and maintain a safe educational environment. Monitoring includes system activities, usage analytics, review of AI interactions, community submittals, frequent questions raised by students, and project outcomes. Such monitoring is conducted solely to protect students and maintain the integrity of educational processes.

12. INCIDENT MANAGEMENT

Schools must establish procedures to address incidents involving misuse of aiSTART. Possible responses may include warnings, temporary suspension of AI access, and school disciplinary procedures. School shall consider institutional action for serious or repeated violations of the policies.

13. POLICY REVIEW

Because AI technologies evolve rapidly, this policy will be reviewed periodically to ensure it remains aligned with educational best practices, technological advancements, national regulatory requirements and data privacy changes. Educational institutions may use this policy to develop their own policy as required by local laws or governance standards.

14. AI MODEL BIAS & AUDITING

aiSTART uses multiple large language models (LLM) and creates boundaries applicable for education. The different LLMs continue to change based on the latest evolution of these LLMs so that students get the best output that meets the educational expectations of teachers and students. Models are tested for cultural and demographic bias before acceptance to be available on aiSTART and to be used for personalizing the AI assistants.

15. SUPPORT AND CONTACT

For questions, support requests, or policy-related concerns regarding aiSTART, institutions may contact: support@slangit.ai
